

AKSEN LABS

Services & Pricing Guide

Practical AI, digital experiences, creative systems and managed operations

PREPARED FOR	Prospective clients and partners
PREPARED BY	Aksen Labs
DATE	September 2026

Indicative commercial guide • Final scope and pricing follow discovery

FROM ATTENTION TO ACTION.

AKSEN LABS

From attention to action

Aksen Labs helps businesses and creators turn customer conversations, content, knowledge, and repetitive work into controlled, measurable outcomes. We begin with a bounded business problem, build the smallest useful system, keep people in control where consequences matter, and improve the workflow using real evidence.

POSITIONING Aksen sits between low-cost generic bots and slow enterprise transformation: one accountable partner for strategy, design, implementation, governance, and improvement.

Three outcome pillars

Pillar	What we help clients do	Typical work
Convert	Turn enquiries and demand into qualified next steps	Websites, AI concierge, WhatsApp, lead capture, follow-up workflows
Create	Turn knowledge and ideas into approved creative output	Campaign concepts, content systems, image/video workflows, brand-safe production
Operate	Turn repetitive workflows into controlled intelligent systems	Automation, internal copilots, knowledge systems, approvals, reporting

How pricing works

- Published figures are indicative starting points or ranges in Ghana cedis.
- A final proposal defines deliverables, assumptions, external costs, milestones, and acceptance criteria.
- Third-party model, WhatsApp, voice, email, storage, hosting, and licensed-data usage is separated or governed by an approved allowance.
- Taxes, travel, hardware, paid media, production crews, and specialist licences are excluded unless stated.

DIGITAL EXPERIENCES

Websites and customer journeys

Service	Indicative fee	Typical scope	Typical timing
Landing Page / Campaign Site	GHS 6,500–10,000	One focused conversion journey, responsive build, form, analytics and launch	2–3 weeks
Business Website	GHS 10,000–18,000	Core pages, services, proof, CMS-ready content structure, forms, analytics and basic SEO	3–5 weeks
Growth Website	GHS 18,000–35,000	Advanced journeys, content collections, lead qualification, integrations and performance reporting	4–7 weeks
Portal / Web Application	From GHS 30,000	Authentication, data workflows, dashboards, permissions and custom product logic	Scoped

Common add-ons

- Copy refinement and information architecture: from GHS 2,500.
- Multilingual content structure: from GHS 3,500 per additional language, excluding specialist translation.
- Advanced analytics and conversion instrumentation: from GHS 3,000.
- Client content migration beyond the agreed allowance: scoped by volume and condition.

AI CUSTOMER EXPERIENCE

Concierge, qualification and channel systems

Offer	Indicative fee	Buyer receives
AI Opportunity Sprint	GHS 5,000–12,000	Workflow map, baseline, risks, data plan, pilot boundary, controls and success measures
Productized Website Assistant	GHS 8,000–20,000 add-on	Approved knowledge, FAQ support, guided qualification, lead summary, testing and human handoff
Official WhatsApp AI Extension	GHS 8,000–20,000 add-on	Official channel integration, guided flows, approved templates, handoff and monitoring setup
Focused AI Pilot	GHS 20,000–60,000	One bounded workflow, evaluation, controls, integration, training and four-to-six-week launch support
Multi-workflow Transformation	GHS 60,000–250,000+	Connected agents, systems integration, governance, training, change management and roadmap
HUMAN CONTROL Aksen assistants do not silently invent commitments. Consequential prices, approvals, payments, public messages, and customer promises remain subject to defined human control.		

Examples

- Property and hospitality concierge systems.
- Customer-service and sales qualification assistants.
- WhatsApp enquiry and callback workflows.
- Internal knowledge copilots and guided staff operations.

AUTOMATION AND OPERATIONS

Connected workflows that move work forward

Service	Indicative fee	Typical result
Workflow Automation	GHS 15,000–50,000	A controlled process connecting forms, email, CRM, documents, notifications or reporting
Internal AI Copilot	GHS 20,000–65,000	Approved knowledge, structured tools, permissions, evaluation and staff-facing experience
Lead & Delivery Operations	GHS 20,000–70,000	Pipeline, handoffs, project states, notifications, reporting and selected integrations
Data / Reporting Layer	GHS 12,000–45,000	Defined metrics, data connections, dashboards, alerts and operating review

Every production workflow includes

- A bounded job, success definition, failure handling, and named owner.
- Approved knowledge or data sources with explicit permissions.
- Human approval and escalation where the business consequence requires it.
- Testing across common, difficult, ambiguous, and failure scenarios.
- Basic observability for usage, cost, errors, quality, and outcomes appropriate to scope.

CREATIVE INTELLIGENCE

Campaign, image, video and content systems

Offer	Indicative fee	Typical deliverables
Creative Direction Sprint	GHS 5,000–12,000	Brief refinement, audience/message, visual territories, references and production plan
AI Image Campaign	GHS 8,000–25,000	Approved concept, generation, selected retouching, variations, formats and usage record
AI-Assisted Video Package	GHS 12,000–40,000	Concept, script, storyboard, generated/edited sequence, review and platform adaptations
Content Operating System	GHS 12,000–35,000	Source intake, voice guide, idea extraction, multi-channel drafts, approvals and publishing packages
Managed Creative Studio	From GHS 6,000/mo	Agreed monthly brief, production allowance, review rhythm and performance learning

Final creative cost depends on asset count, complexity, identity continuity, retouching, voice/music rights, specialist editing, paid-media versions, and production requirements. Generated people, products, claims, likenesses, and sensitive scenarios require explicit review and appropriate disclosure.

MANAGED SERVICES

Support, monitoring and continuous improvement

Plan	Indicative fee	Best for	Typical coverage
Website Care	From GHS 900/mo	Business websites	Monitoring, backups, minor updates and technical support allowance
AI Care	From GHS 1,500/mo	Productized assistants	Website care plus knowledge updates, response monitoring and monthly review
Managed Agent Operations	GHS 4,000–18,000/mo	Operational AI workflows	Evaluation, incident support, cost/quality review, improvements and reporting
Transformation Partner	Custom retainer	Multiple teams and workflows	Roadmap, governance, delivery leadership, change management and portfolio review

Service-level details are agreed per engagement

- Support hours, response targets, included change allowance, reporting cadence, and escalation contacts.
- Approved model and channel budgets, overage treatment, and cost alerts.
- Knowledge owners, update process, incident handling, retention, and access review.

ENGAGEMENT MODEL

From first conversation to measurable operation

Stage	Purpose	Exit gate
1. Qualify	Confirm need, urgency, owner, budget range and current workflow	Discovery is worth both parties' time
2. Discover	Map workflow, baseline, users, systems, risks and success	Problem and pilot boundary are agreed
3. Propose	Define scope, deliverables, exclusions, price, responsibilities and controls	Approved agreement and payment trigger
4. Design & build	Create the experience, tools, content, data connections and test cases	Acceptance criteria can be tested
5. Evaluate & approve	Review quality, safety, failure handling and human control	Named owner approves release
6. Launch & observe	Release, support, measure, learn and prioritize improvements	Stable operation and outcome review

Standard commercial defaults

- Projects typically use milestone payments, commonly 50% / 30% / 20% unless scope suggests another structure.
- Two consolidated review rounds per major stage are normally included.
- New requirements are handled through written change control before work begins.
- Aksen retains reusable methods, platform components, and pre-existing intellectual property; project-specific ownership is defined in the final agreement.
- This guide is not a quotation, service-level agreement, or binding offer.

START HERE

Choose the smallest engagement that can prove value

The strongest first engagement is specific enough to measure and valuable enough to matter. Aksen Labs will recommend a practical starting point after a short qualification conversation.

If you need...	Recommended first step
A credible digital presence and better enquiries	Business Website or Growth Website
Faster answers and structured customer qualification	Productized Website Assistant
A serious workflow problem with unclear scope	AI Opportunity Sprint
Proof that one AI workflow can operate safely	Focused AI Pilot
Ongoing quality, cost and improvement ownership	Managed Agent Operations
A repeatable campaign or content production system	Creative Direction Sprint or Content Operating System
NEXT ACTION Request a discovery conversation and receive a tailored proposal with scope, milestones, assumptions, and final pricing.
