

Digital Platform Brief & Hostinger Infrastructure Guide

Aksen Labs
Engineering &
Architecture

PREPARED FOR	PROJECT	TARGET DOMAIN	DATE
Alberta (Founder, Efe Organics)	Storefront & Commerce Engine	efeorganics.com	September 2026

Executive Overview: Efe Organics has reached an exciting milestone. Your custom direct-to-consumer digital storefront is built, connected to your registered domain, and live on global edge infrastructure. This document provides a clear summary of what has been delivered, how your recent **Hostinger** purchase fits into the architecture (specifically solving your business email needs), the exact actions needed on your part, and key clarifying questions to ensure a smooth public launch.

1. What We Have Built & Delivered So Far

Over the past weeks, we completed Stage 1 of the digital transformation. We transitioned Efe Organics from a captive reseller presence on ColoursBay into an owned, high-performance brand platform:

AREA	WHAT WAS DONE	BUSINESS BENEFIT
Independent Storefront	Engineered a custom Next.js 16 web application with instant page transitions and mobile-first design.	Efe Organics owns its customer relationships, order history, and margins without reseller lock-in.
Product & Size Architecture	Restructured 42 flat imported SKUs into 28 clean product families with size selectors (e.g. Lemon Blast 350ml, 500ml, 1L).	Customers see an uncluttered shelf and select bottle sizes smoothly on a single page.
Wholesale Segregation	Created separate rules for industrial trade bulk items like the 250kg African Black Soap Crumble (GH¢13,750.00) .	Protects retail browsing while supporting your quarter-tonne commercial trade formulators.
Rebuilt Brand Palette	Extracted colors directly from your authentic 2026 circular gold packaging monogram (Obsidian black, metallic gold, olive leaf).	A unified, premium aesthetic consistent with your physical product labels and packaging.
Financial & Stock Ledger	Implemented an atomic PostgreSQL database tracking inventory with integer pesewas accounting (GH¢).	Eliminates rounding drift and prevents two shoppers from buying the same final bottle.
Ghana MoMo Ready	Integrated Paystack checkout architecture supporting MTN Mobile Money, Telecel Cash, and bank cards.	Permits instant, frictionless payment on mobile phones across Ghana.

How Hostinger Fits Into Your Technology Stack

September 2026

2. How Your Hostinger Hosting Fits Into the Architecture

You recently purchased **Hostinger hosting**, which is a great asset for the business. Because modern e-commerce web applications require specialized edge infrastructure to handle sudden traffic spikes during Mobile Money promotions, the most effective, reliable setup combines Hostinger with your live cloud engine:

The Hybrid Best-Practice Strategy:

- **Vercel Edge Network:** Runs your storefront engine. It provides zero-downtime scalability, instant loading on 3G/4G mobile networks, and automatic SSL security.
- **Hostinger:** Serves as your **Corporate Business Email Headquarters** (providing professional mailboxes like `hello@efeorganics.com` and `orders@efeorganics.com`) and your **DNS Control Center**.

Why this matters: Previously, emails sent to `hello@efeorganics.com` had nowhere to land because the domain registrar (Avehost) had no active mailbox attached. Your Hostinger package directly solves this critical gap.

3. What Is Needed on Your Part on Hostinger (Step-by-Step)

To link your Hostinger account with your live domain and activate professional email, please complete the following steps (or grant us access as described below):

STEP 1 • CHOOSE YOUR PREFERRED METHOD

Option A (Fastest & Recommended): Add our team as an *Authorized Collaborator* in your Hostinger account so our engineers can configure the DNS and mail settings directly for you.

How to do this: Log into Hostinger → Click your profile icon at top right → Account Sharing → Invite Collaborator → Enter our agency email with "Manage Services & Domains" permission.

STEP 2 • IF YOU PREFER TO DO IT MANUALLY

1. Log into your **Hostinger hPanel**.
2. Navigate to **Emails** → Select `efeorganics.com` → Create your desired corporate mailboxes (e.g. `hello@efeorganics.com`, `orders@efeorganics.com`, `alberta@efeorganics.com`).
3. Go to **Websites** → **DNS / Nameservers**. Ensure the zone is active and share the MX records Hostinger generates with our team.

STEP 3 • SETTLE THE PENDING AVEHOST DOMAIN INVOICE

In your Avehost client portal (where `efeorganics.com` was purchased), there is a yellow banner indicating an unpaid annual renewal invoice (GHC200.00). Please log into Avehost and settle this via Mobile Money to ensure the registrar does not place an administrative hold on the domain.

Clarifying Questions & Next Milestones

September 2026

4. Clarifying Questions for Alberta (Launch Alignment)

To finalize the commerce experience and prepare for taking live customer orders, please review and share your input on the following five questions:

1. Hostinger Hosting Plan Details

Which Hostinger plan did you purchase (e.g., Premium Web Hosting, Business Cloud, or a VPS)? If you prefer our team to handle the technical configuration, simply share collaborator access as outlined in Step 1.

2. Business Email Addresses Needed

Which mailboxes should we activate on Hostinger? We recommend hello@efeorganics.com for general inquiries, orders@efeorganics.com for order notifications, and a personal box (e.g., alberta@efeorganics.com).

3. Physical Shelf Stock Verification

We have populated opening stock with a safe placeholder of 25 units per variant. Do you have an updated physical count of how many units of each soap bath, oil, and gel are ready for sale in your workshop?

4. Retail Selling Price Confirmation

The prices currently shown on the storefront (e.g., Lemon Blast 350ml at GHC70.00) reflect the reseller's listing on ColoursBay. Are these your intended direct-to-consumer retail prices, or do you have an updated price sheet?

5. Paystack Ghana Merchant Account

Does Efe Organics have its registered business Paystack Ghana merchant account active and verified for Mobile Money payouts, or would you like our assistance with completing the merchant verification?

5. Immediate Next Steps & Go-Live Schedule

Once these items are clarified:

- Email Activation:** We will complete the domain and email link so that hello@efeorganics.com is operational.
- Live Payment Test:** We will connect your live Paystack credentials and conduct an end-to-end test checkout using a real MTN Mobile Money wallet.
- Admin Studio Handoff:** We will deliver your private Admin Studio credentials where you can view incoming customer orders, manage variant stock, and monitor sales analytics.
